

Supernova Remnant

The figure displays four panels of the Crab Supernova Remnant: X-RAY (purple), OPTICAL (green/blue), INFRARED (orange/red), and RADIO (magenta). To the right, a diagram shows 'SN 1054' with a crescent moon visible in the sky. Below it, several examples of crescent moons in rock art are shown, including 'Crescent Moon from Abasco', 'Crescent Moon from Abasco', 'Crescent Moon from Abasco', 'Crescent Moon from Abasco', 'Crescent Moon from Abasco', and 'Crescent Moon from Abasco'. A note states: 'Several examples of crescents in rock art from the American Southwest are associated with the date of the A.D. 1054 supernova.'
